Experience

The price is right

 October 2024  University of Lens, in Lens

In teams of three, we created a fair "The price is right" based on Amazon products, using Python and Flask, as well as an API to retrieve data such as price and name.

Minesweeper

 June 2024  Personal project

Development of a minesweeper game in JavaFX, with an interface and a menu for choosing the level. The game logic is coded in Java, and interactions are managed via the JavaFX framework to deliver a fluid experience.

Pokedex

 January 2024  Personal project

Creation of a Pokedex in Python with an SQL database. The application can search and look a Pokemon, with detailed information such as type, statistics and evolution. Data management is performed via SQL queries.

Education

Three year university degree in technology

University of Lens

 Sept 2023 - June 2026  Lens

Baccalauréat with IT and Mathematics specialties

High School Arthur Rimbaud

 Sept 2020 - June 2023  Sin-Le-Noble

Skills

Java, Python, SQL, HTML/CSS

PHP, Git, Laravel, JavaScript, JavaFx, Flask

Unit testing

Bash, IP and server configuration

Teamwork, Agile methodology

Adaptability, Autonomy
